<tr>
<td>Inbound arrivals to France rose by 1% in 2015, to reach 84 million</td>
</tr>
<tr>
<td>Combined with the 3% increase in domestic trips, this contributes to an overall average performance of 3% for local tourism flows in 2015</td>
</tr>
<tr>
<td>Inbound arrivals are set to increase by a CAGR of 2% in the forecast period, to reach 94 million in 2020</td>
</tr>
</tbody>
</table>

**TRENDS**

- The terrorist attacks on Paris in 2015 had a limited impact on the overall year's performance, as these did not happen until the end of 2015, too late to impact the key summer season. Inbound arrivals to France enjoyed a steady increase of 1% in 2015. The country enjoyed excellent weather conditions from June to October, and growing success amongst tourists from the Asia Pacific region.
- In collaboration with provincial tourism boards and various French embassies, Visit France is in charge of the promotion of France as a tourist destination. This organisation spends the bulk of its budget on offline and online communications campaigns in 2015, targeting the 31 countries in which it has offices are active. Visit France also gathers insight into the behaviour of domestic tourists and foreign tourists in various countries, with the aim of improving its tourism offer. In turn, this also contributes to the promotion of France. From July 2015, this notably led to increases in the number of retail outlets allowed to open on Sundays in designated tourist areas, and the deregulation of intercity bus lines.
- Several attributes contributed to maintaining France as the top of the world's leading tourist destinations in terms of inbound arrivals. The country enjoys a prime location in the heart of Western Europe, and varied and appealing landscapes and cultural aspects. It has the largest beaches of any country in Europe, and the largest number of ski slopes in the world – it retains the top position in terms of ski destinations ahead of the US in 2015. While Spain, the main competitor to France in terms of inbound arrivals at global level, benefits from extended periods of virtually guaranteed sunshine and growing and improving lodging capacity, France has some of the leading tourist attractions in the world, such as historic buildings/monuments including the Eiffel Tower and Versailles, world-class museums including the Louvre and themed/amusement parks such as Disneyland Paris.
- Western Europe remained the main source market in 2015, accounting for 78% of total inbound arrivals, with the two main countries being Germany and the UK. Amongst the contributors to the good performance of inbound arrivals in 2015 were the US, notably due to the more favourable exchange rate of the US dollar against the euro and Asia-Pacific in general. Tourists mainly spent their money on gastronomy, wine, and, in particular, luxury goods. Paris remained the leading destination globally for the purchase of luxury goods in 2015, according to Euromonitor International's luxury goods research.
- More than ever, Visit France and French department stores targeted the international BRICS countries in 2015. The number of arrivals from India, and mainly China, still posted robust growth in 2015. Paris remained the top European destination for Chinese tourists, and their frequentation of Parisian hotels rose by 44% during the first half of 2015, according to the trade association of tourism of Paris-Ile de France. According to Insight from Visit France, in early 2015, the average Chinese tourist spends 47% of their budget on shopping.
- The national tourism board and various stakeholders also use social media and mobile web campaigns and apps to promote France as a tourist destination. From 2014, regional tourism boards collaborated on the Palmyre du Tourisme Numérique (E-Tourism awards), which recognised apps such as Monument Tracker in Angoulême, Chef Recipes in Lyon and Drone Pilot, a new sports designation system, whose GPS technology is present in key points in retail outlets, enabling foreign customers to engage in duty-free purchases.

**Colombia Suggests Premiumisation a Viable Emerging Market Strategy for Soft Coffee Pods**

Opinion | 11 Apr 2016

Fresh ground coffee pods have been the star performers in coffee, growing from US$1.7 billion in 2008 to US$13.5 billion in 2015. However, most of the growth has come from hard pods, rather than soft pods. Hard coffee pods have won out over soft coffee pods by offering a wider variety of beverage choices, “fresher” flavour and stylish machines. Falling demand for soft coffee pods led them to be discontinued in US and Canada, the number one and four coffee pods markets. In Colombia, soft pods currently have a larger volume share of total coffee pods than hard pods. However, as upper income Colombians become more sophisticated coffee

**HOT DRINKS FORECAST MODEL**

**Research Sources:**
1. Hot Drinks: Euromonitor from trade sources/national statistics
EXAMPLE: ANALYSIS OF THE COFFEE MARKET DEVELOPMENT IN ROMANIA

Coffee in Romania
Category Briefing | 07 Apr 2016

HEADLINES

- Retail sales of coffee register 3% growth to reach RON1.9 billion whilst retail volume sales rise by 2% to reach 30,700 tonnes in 2015
- Low but growing purchasing power continue to impact coffee sales in 2015
- Foodservice volume sales stagnate in 2015 compared to off-trade sales which grows by 2%
- Mondelez Romania retains the lead with a 35% value share in 2015
- Retail volume sales are expected to increase at a CAGR of 3% to reach 34,890 tonnes in 2020 whilst retail value sales at constant 2015 prices are projected to rise at a CAGR of 2% to reach RON2.1 billion in 2020

TRENDS

- Coffee is by far the largest category in hot drinks in Romania and therefore trends in coffee also shape the hot drinks market as a whole. Coffee is popularly consumed when socialising and relaxing, therefore sales were stimulated by economic recovery and the ensuing rise in consumer confidence, which led to volume and current value growth. However coffee consumption at 2kg per capita remained low compared to other EU countries, as the increase in purchasing power remained some distance behind economic growth. In addition to restricted consumption, this also led to a preference for cheaper brands and promotions.

- As a result of stagnating foodservice coffee sales in 2015, the vending channel continued to gain share, to reach 2% in volume terms. Rising urbanisation, busier lifestyles and restricted consumer spending power made coffee from vending machines more attractive than coffee purchased from on-trade outlets.

- With the exception of fresh ground coffee pods, all other coffee categories registered declines in unit prices during 2015. Players chose to engage in frequent price promotions in order to boost consumption, which dampened value growth, as any increases in unit prices were untenable for the majority of the population.

- In the past, coffee sales have tended not to infringe on sales of tea as the consumption occasions and reasons for purchase varied. For instance, historically tea has generally been consumed in the morning, although this is changing given its increasing associations as a healthy beverage. As such tea’s share of the overall hot drinks market is increasing, and potentially at the expense of coffee going forward.

**The Best of Q1 2016 on Passport Economies**

*Opinion | 13 Apr 2016*

Sarah Boumphrey  
Head of Strategic, Economic & Consumer Insight

The year began with a host of bad economic news with emerging markets in particular in the firing line. The global economy faces mounting risks this year: the China slowdown, as well as those of other large emerging markets such as Russia and Brazil; and instability in the Middle East will continue to cloud the horizon. With this in mind, our clients were most interested in understanding the outlook for the year ahead.

Here are some of the quarter’s most read content on Passport Economies:

**Global Economic Forecasts Q1 2016**

Hard landing or no hard landing – this question has been bothering the analysts in the last months, with experts taking opposing views, further blurring the future perspective and refreshing the still vivid memories of 2008.

**MACRO MODEL**

Explore latest macroeconomic forecasts and simulate a variety of alternative macro scenarios.
